

ANNOUCEMENT

HUDCO DESIGN AWARDS 2021-22

ABOUT HUDCO DESIGN AWARDS

HUDCO, a Government of India CPSE, is a premier techno-financing Institution in the field of Housing & Urban Development in India. Since its inception in 1970, HUDCO has played a leadership role in shaping India's urban development. HUDCO appreciates that the complex challenge of sustainable development goes much beyond creation of housing stock and financing infrastructure. It acknowledges the importance of design that respects the interconnectedness and interdependence between places, regions and communities as well as between man and nature in shaping sustainable development. Aligning with its overarching institutional objective of raising awareness about design as an effective element for positive change and appreciate the innovative design interventions that have been demonstrated by professionals, HUDCO instituted HUDCO Design Awards in 2012.

Objective of the Award:

- (i) To encourage professionals (architects, engineers, urban planners and other allied professionals) to be more creative and provide out of the box solutions.
- (ii) To use creative design for improving the living environment in our cities.
- (iii) To document/ showcase the best practices with possibility of replication and scalability.
- (iv) To sensitize the decision makers/ stakeholders regarding utility and applicability of innovative designs.

HUDCO DESIGN AWARDS 2021-22 : CATEGORIES

Category 1

Cost Effective Rural / Urban Housing deploying Innovative / Emerging & Disaster Resistant Technology

Category 2

New & Innovative Town Design Solutions / Eco Cities

Category 3

Conservation of Heritage

Category 4

Green Buildings

Category 5

Landscape Planning & Design

Category 1:

COST EFFECTIVE RURAL/ URBAN HOUSING DEPLOYING INNOVATIVE/ EMERGING & DISASTER RESISTANT TECHNOLOGY

Aangan Good Earth,
Photo Courtesy: Jayakumar & Associates, Bangalore

Housing shortage in India, has been a matter of concern. Appreciating the importance of housing, Government of India has launched the Pradhan Mantri Awas Yojana (PMAY) that aims to provide housing for all by the year 2022. The success of this Mission will require adoption of modern, innovative, and green technologies and building material for faster and quality construction of houses.

It would also entail preparation of efficient layout designs and building plans suitable for various disaster resistant technologies so that the precious investment in housing is not lost to the occurrence of natural disasters like earthquake, flood or cyclone. The skills and efficiencies demonstrated by the professionals with regard to the same need to be appreciated and showcased for its suitable adaptation.

Note: The word housing is used as a generic term. Individual houses, rental housing, and houses with non-residential use are also eligible to apply under this category.

Category 2:

NEW & INNOVATIVE TOWN DESIGN SOLUTIONS / ECO CITIES

Hillside Township Project, Bellary, Karnataka
Photo Courtesy : IMK architects, Mumbai

Urbanization is inevitable and desirable but throws many challenges. For cities to be engines of growth, they need to be vibrant, inclusive and appropriate to the specific demographic, cultural, functional and physiographic demand of the people and the place.

It is imperative that we create new smart cities and also upgrade our old ones so that they provide opportunities to the aspiring Indians without compromising the tenets of sustainable development.

Category 3:

CONSERVATION OF HERITAGE

Commissariat building, Mumbai

Cities are dynamic entities that experience expansion, development, renewal and redevelopment. The tasks of the professionals are not limited to integration of the built heritage with the urban planning/ development framework but also to exclusively promote and practice conservation, restoration, regeneration and management of valuable built heritage in Indian cities.

A comprehensive approach to heritage management that demonstrates economic efficiency, creative vigor and people's participation is the need of the hour for there are many cities in India that abounds in precious built heritage that is either neglected or at the mercy of unplanned urban development.

Category 4:

GREEN BUILDINGS

Shishu Children Hospital, Vadodara
Photo Courtesy : Harmony Planning Services Pvt Ltd.

Rising carbon footprints and consequent climate change is a harsh reality that needs to be resisted and rectified by all concerned and at all levels possible. In a rapidly urbanizing world and increasing built up space, energy efficiency of buildings is believed to play an important role in combatting this menace. It is well established that consumption of energy and consequent carbon footprints of buildings can be considerably reduced through adoption of efficient and sustainable design specifications, appropriate choice of materials and proficient construction practices.

Designing a green building from planning to construction, operation, maintenance is the need of the hour to combat the climate change challenge and ensure sustainable development.

Category 5:

LANDSCAPE PLANNING & DESIGN

Sarvah Kshema Hospital And Research Foundation, Karnataka
Photo Courtesy : Ravikumar and Associates

It is increasingly believed that green open spaces define the culture and character of a city and makes it vibrant and resilient. A well designed and well-maintained green area adds to the social environmental aspect of the city and also improves psychological and physical wellbeing of citizens.

However, the rapidly modernizing cities are increasingly becoming concrete jungles where the green open places are grossly undervalued and therefore neglected. Understandably, there is a growing awareness about importance of public places in impacting sustainable development and finds mention in the Sustainable Development Goals (SDGs). The challenge before the professionals is to design safe, inclusive and accessible green spaces that enhances the image of a city and contributes to environmental sustainability.

HUDCO DESIGN AWARDS 2021-22
